Brand Guidelines

Identity / Typography / Interfaces / Widgets / Motion

Vanod

Clear information Consistent experience

2026

Vanod

One shared system

Find the standard you need / Both editions share the same page order

01 **Identity** 03 – 11

Marks, clear space, construction and misuse

02 **Design language** 12 – 17

Colour, type, grids and functional icons

03 **Interface elements** 18 – 20

Controls, order review and market charts

04 **Widgets** 21 – 27

Formats, settings, privacy and accessibility

05 **Screens and motion** 28 – 30

Mobile, web, loading and feedback

06 **Brand applications** 31 – 34

Hardware, packaging, spaces and handoff

Vanod

The mark system

Use the integrated wordmark first; reserve the V for compact contexts and motion

PRIMARY SIGNATURE

The first V and the remaining letters form one fixed vector signature.

Standalone V

Compact mark
Loading and feedback

App icon

Centred wordmark
Use the master

The approved outlines are fixed assets; never replace them with typed text

Vanod

Space and scale

Set clear space from the visible mark height; scale proportionally

WORDMARK ½H STANDALONE V ¼H

Full wordmark

Minimum digital width: 80 px.

Allow more space on busy backgrounds.

PROPORTIONAL SCALE

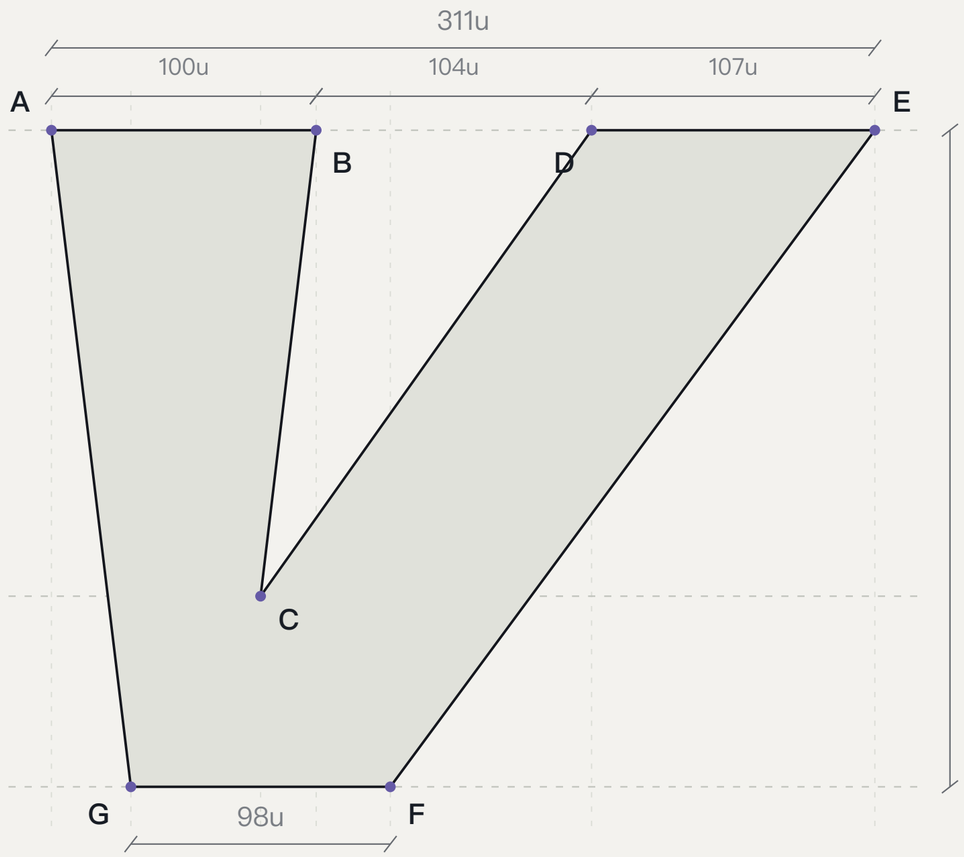

Compact mark

Use 20 px or larger.

Reserve 16 px for favicons.

V construction

A reproducible geometric standard built from the approved vector master

One shared unit

u = H / 248

H is the visible height of the mark

Fixed proportions

Width 311u Height 248u

Top spans 100u 104u 107u

The solid base GF is 98u

Source coordinate units

In the source SVG, 1u = 2 units

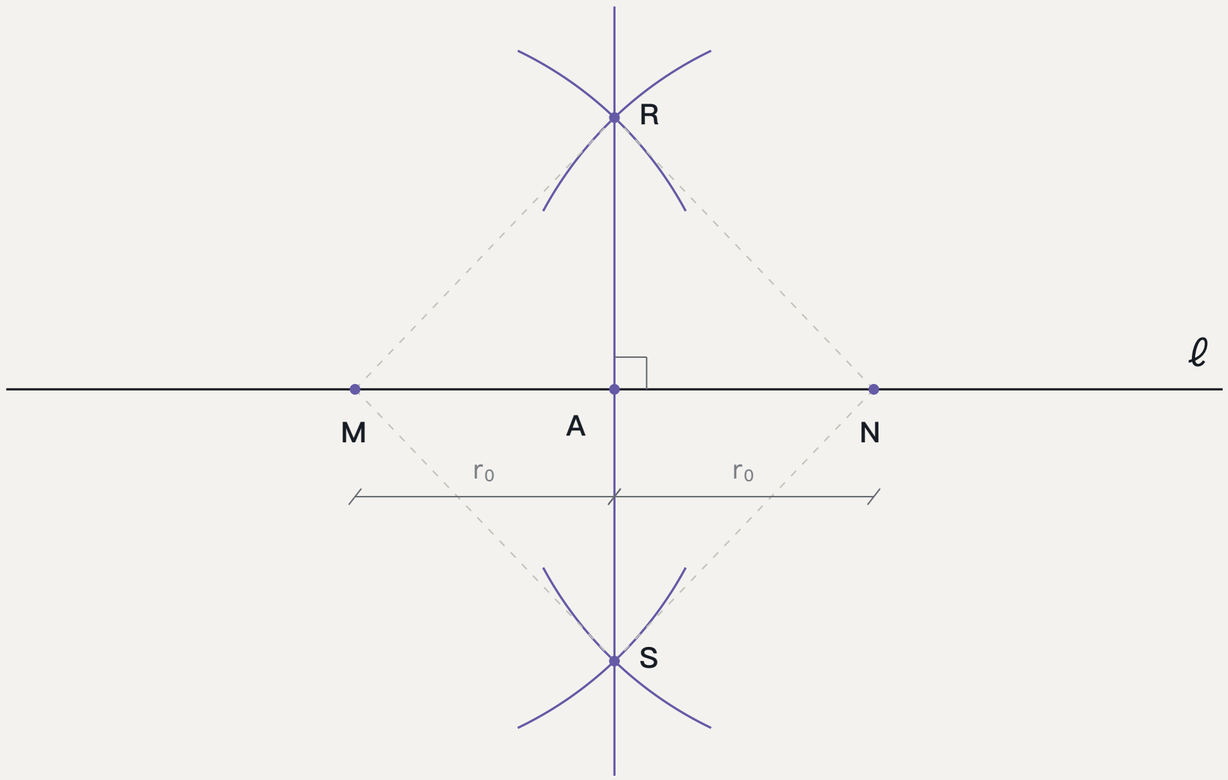

All seven original vertices are retained

Solid lines: contours and dimensions Dashed lines: projections Violet dots: fixed vertices

Vanod

Perpendicular construction

Establish horizontal and vertical references with equal–radius compass arcs

01 Transfer equal distances

Choose A on baseline ℓ. With A as the centre, mark M and N so that AM = AN.

02 Draw equal–radius arcs

Draw arcs centred on M and N with the same radius r. Choose r > AM so they meet at R and S.

03 Join the intersections

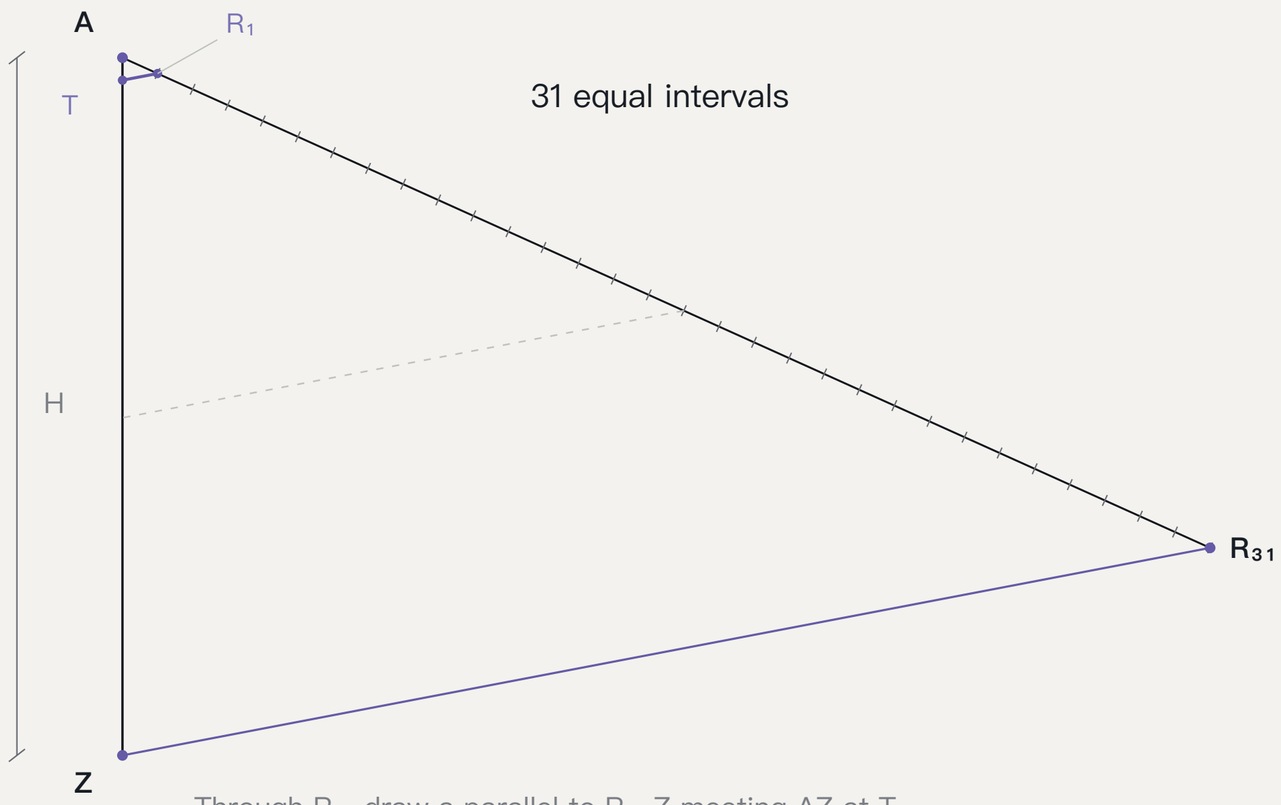

Join R and S to obtain the perpendicular through A. Reuse this construction for bisections.

MR = NR and MS = NS Therefore RS is the perpendicular bisector of MN

Vanod

Defining the unit

Divide the visible height H into 31 equal parts, then bisect three times

Through R_1, draw a parallel to $R_{31}Z$ meeting AZ at T.

AT = H / 31

Transfer 31 equal steps along the ray.
Similar triangles give the first height AT.

H / 31

H / 62

H / 124

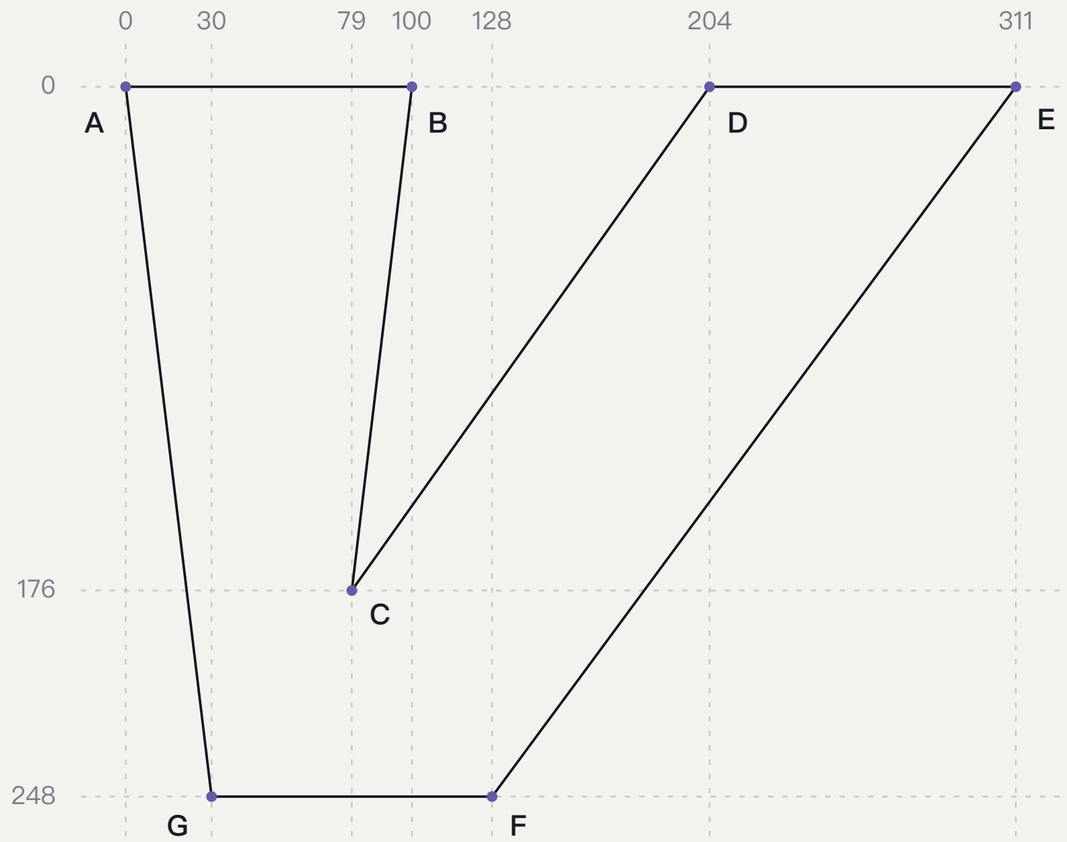

H / 248 = u

Construct parallels using two perpendiculars Right–hand segments show enlarged bisections

Vanod

Locating the seven vertices

Transfer the modular distances and intersect their perpendicular projections

Vertex	x / u	y / u
A	0	0
B	100	0
C	79	176
D	204	0
E	311	0
F	128	248
G	30	248

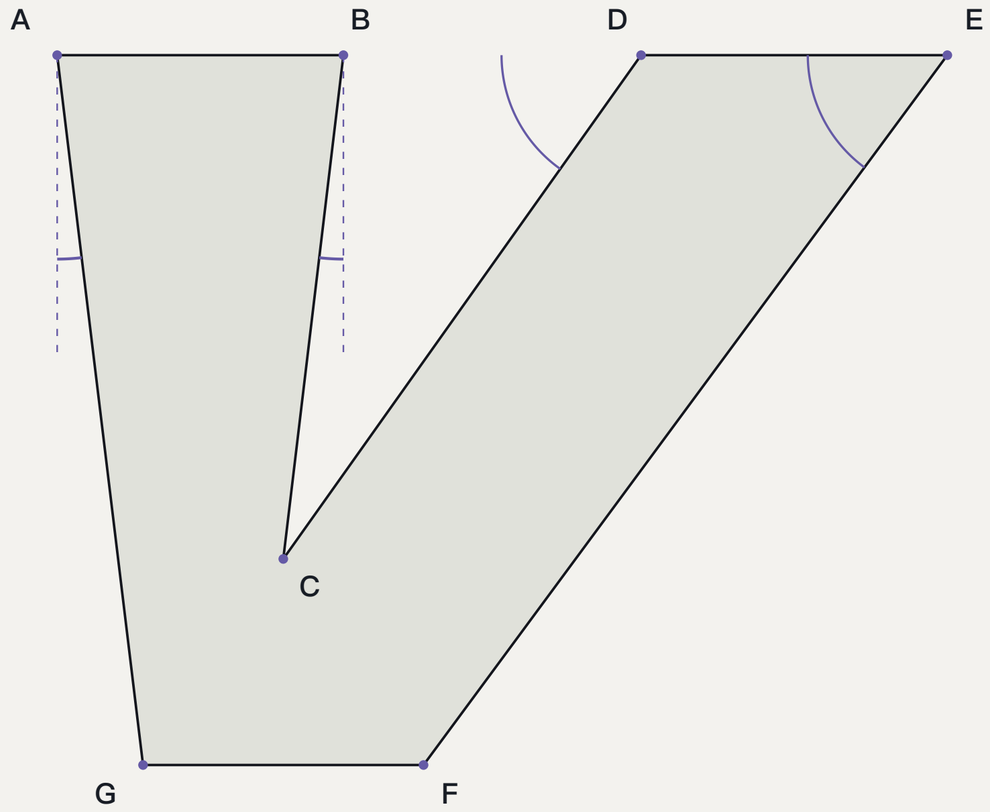

Origin A x increases right y increases down

All dimensions are exact multiples of u Use compass transfer or repeated doubling

Vanod

Verifying the angles

Use angles as a check; reconstruct the mark from exact coordinates and projections

Left–leg angles are measured from vertical Right–leg angles are measured from horizontal

AG Outer left 6.897428°

From vertical — atan(30/248)

BC Inner left 6.804260°

From vertical — atan(21/176)

CD Inner right 54.616592°

From horizontal — atan(176/125)

EF Outer right 53.576264°

From horizontal — atan(248/183)

The inner and outer slopes are unequal.
Never redraw using rounded angles.

Vanod

Closing the master outline

Join the fixed vertices in sequence and remove the construction lines

Closed sequence A → B → C → D → E → F → G → A

One closed silhouette

Seven vertices form a solid polygon.

Do not round, mirror or move the inner vertex.

Proportional output

Keep the aspect ratio at 311 : 248.

Scale both axes together.

Use a solid fill with no added stroke.

Source SVG mapping

xSVG = 216 + 2x

ySVG = 264 + 2y

Logo misuse

Keep the approved outlines, proportions, colours and composition

Always start from the master

Use the supplied vector files.
Do not redraw the lettering or turn the mark into a visual effect.

× Extra initial

× Distorted proportions

× Unapproved colour

× Outline treatment

× Changed angle

Vanod

× Typeset substitute

Vanod

Brand colours

Neutrals organise the interface; lilac identifies the brand; semantic colours carry data

Graphite

#13161D

RGB 19 / 22 / 29

Lilac

#B8B4FF

RGB 184 / 180 / 255

Ice

#EFEDFF

RGB 239 / 237 / 255

NEUTRAL HIERARCHY

Canvas	Raised	Divider	Secondary	Primary
#0B0D12	#1C202A	#2A2E39	#A5A9B7	#F6F6FA

SEMANTIC COLOURS

+2.84%	#88D9B5	Up
–1.26%	#FF929B	Down

Use sRGB for screens; pair market colours with signs and readable labels

Vanod

Typeface and weights

Keep the outlined wordmark; use PingFang SC for editorial and interface text

PingFang SC

Aa 0123456789

Clear information

Consistent experience

UPRIGHT BODY TEXT / FIXED BRAND ARTWORK

Regular

Body text and explanations

Medium

Labels and secondary actions

Semibold

Titles, prices and key actions

Hierarchy and numbers

Interface type sizes and leading; keep amounts and units complete

48 / 60 **Display title**

32 / 40 **Page heading**

24 / 32 **Section heading**

17 / 26 Body and guidance

12 / 18 Labels and captions

AMOUNTS AND UNITS

0.025 BTC

$2,029.86

+2.84%

Align data and meaning

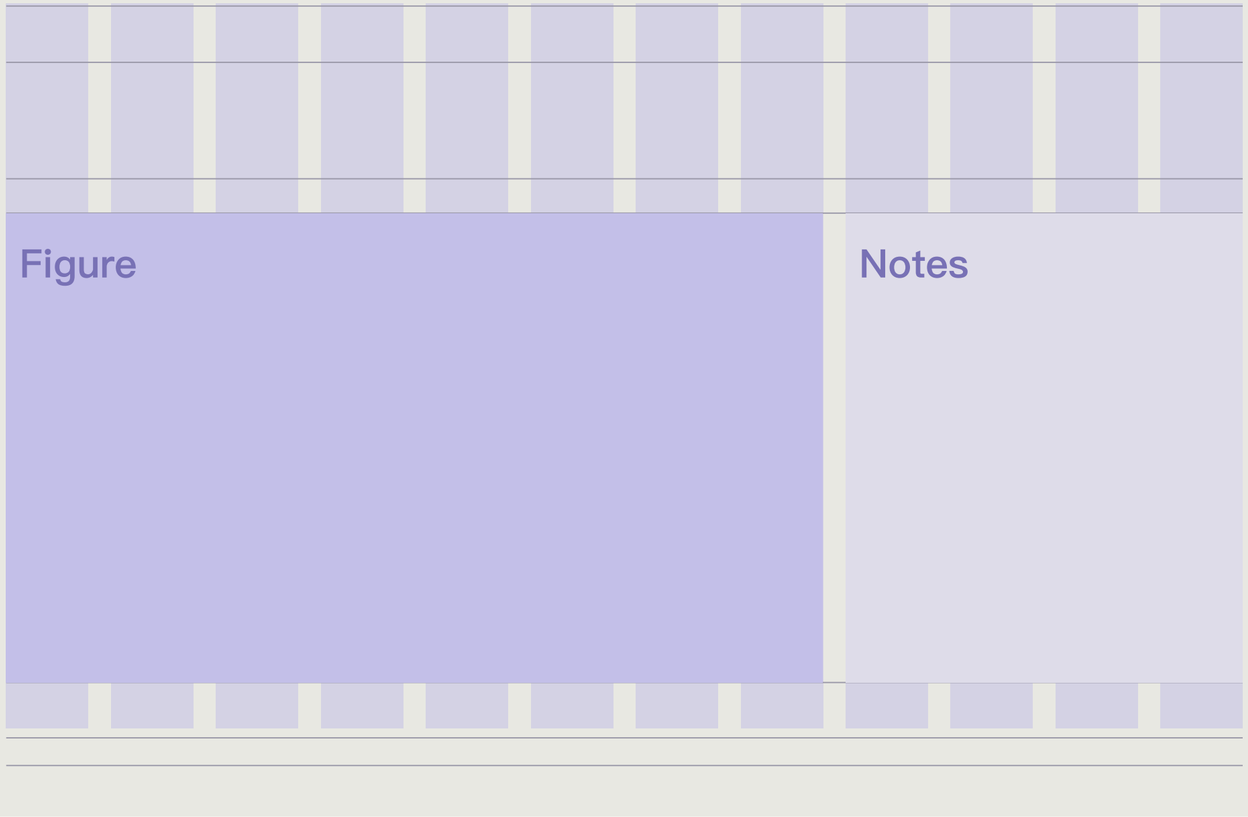

Right-align amount columns.
Keep units next to values.
Use consistent precision without hiding meaningful digits.

Type size / leading are design scales; accessibility settings may increase layout height

Vanod

A shared layout grid

Repeat a small set of templates; keep the same reading anchors on every page

72	Outer margin
12	Shared columns
24	Column gutter
8	Base spacing unit

Vanod

Functional icon geometry

Use one drawing standard for interface icons; preserve the solid brand mark

24 × 24 GRID / 2 UNIT SAFE AREA

1.8

Default stroke width

24 / 20 / 16

Check stroke weight at each display size

Round caps and joins

Keep open outlines; do not add shadows or bevels.

Touch targets are separate from glyph size: at least 44 pt on iOS and 48 dp on Android

Vanod

Functional icon library

Different actions, one visual language; retain clear text labels

Overview	Markets	Trade	Wallet	Hardware	People
Activity	Settings	Search	Notification	Add	Close
Arrow Up Right	Send	Receive	Copy	Scan	Bluetooth
Lock	Shield	Check	Error	Chevron Right	External Link

Controls and input

Clear actions, stable states and guidance beside the issue

Actions

Confirm order

Primary action

View details

Secondary action

Unavailable

Keep the label and explain why

Cancel order

Name the affected order

Input

Quantity

0.025 BTC

The label and unit stay visible

Quantity

1.000 BTC

Insufficient available amount. Enter less.

Lilac identifies the primary action. Errors always include text.

Interface and widget concepts / Illustrative market data

Vanod

Review and feedback

See the amount before submitting and the status afterwards

Submitting

Keep the order visible and prevent duplicate submission

Simulated order saved

Show the order reference and next action

Quote expired

Refresh the quote before confirmation

Interface and widget concepts / Illustrative market data

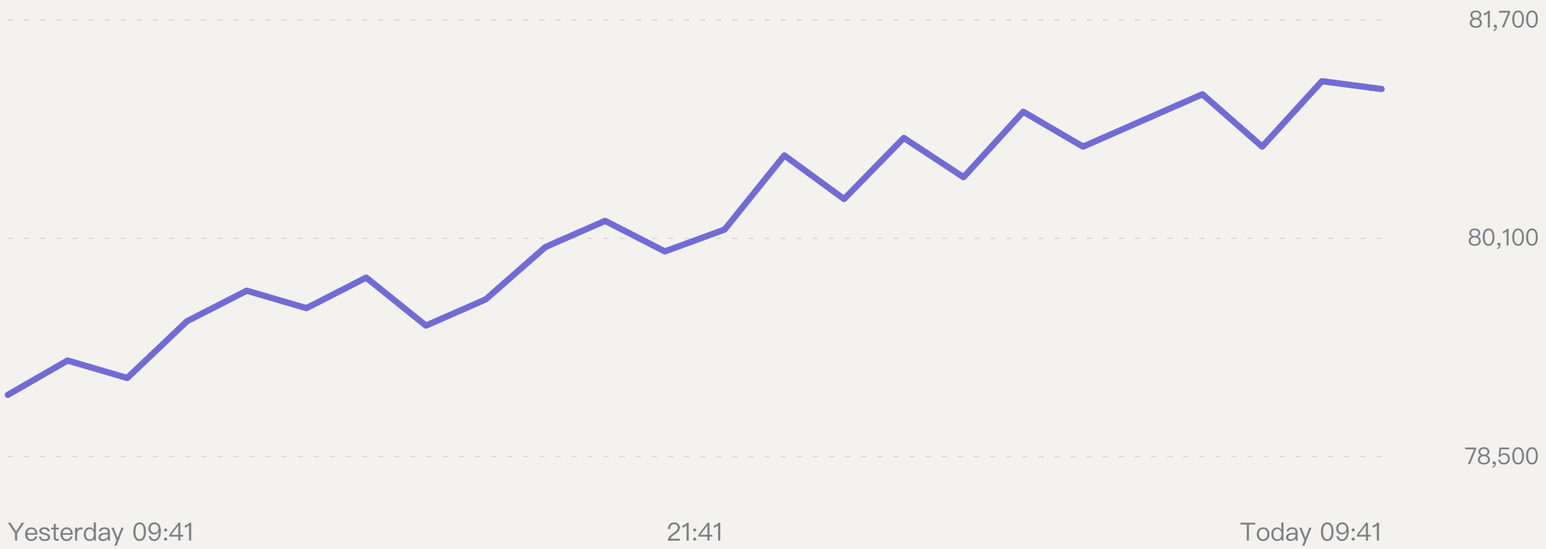

Market charts

Price, time and change share the same basis

BTC / USD

81,194.20

+2.84% 24H

Time range

Match the change percentage to the plotted period

Price scale

Show the quote currency and connect sampled values

Data status

Explain missing data instead of inventing a curve

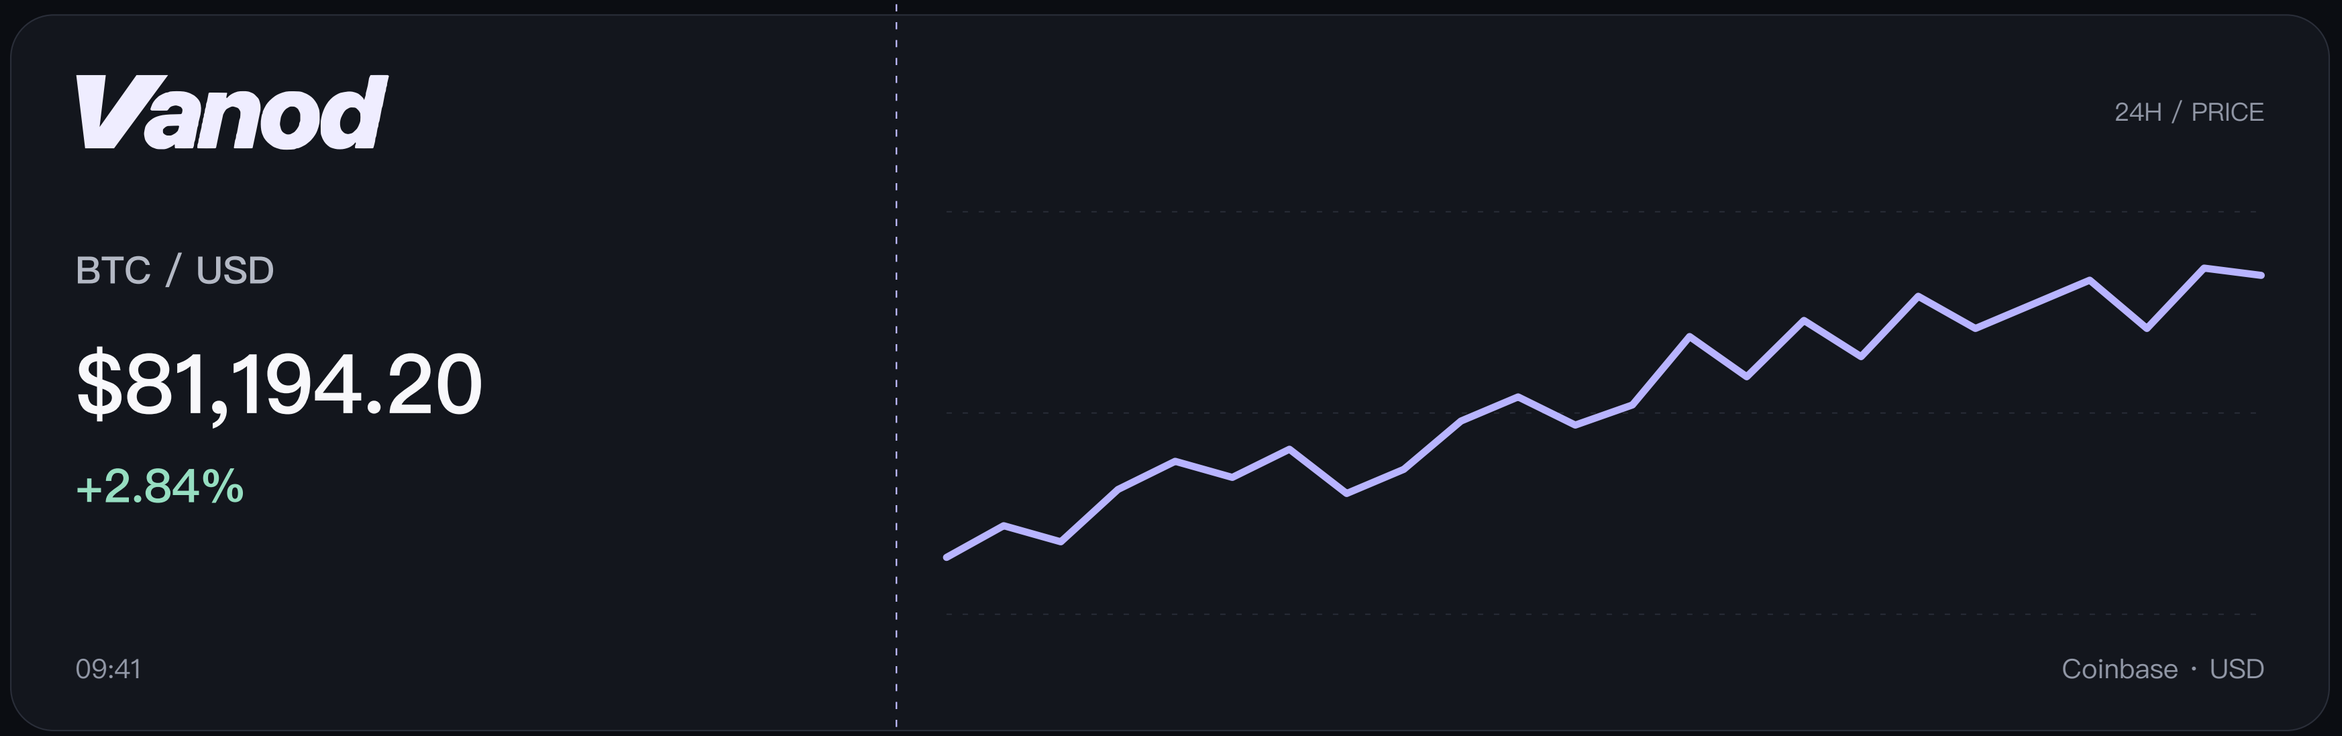

Interface and widget concepts / Illustrative market data

The medium widget

Brand and price on the left, a continuous chart on the right

38.2% Brand and numbers

61.8% Chart and time

Apply the split to the content area. Adapt type and spacing to the system size.

Interface and widget concepts / Illustrative market data

The small widget

One information hierarchy, two ways to read the market

Price and trend

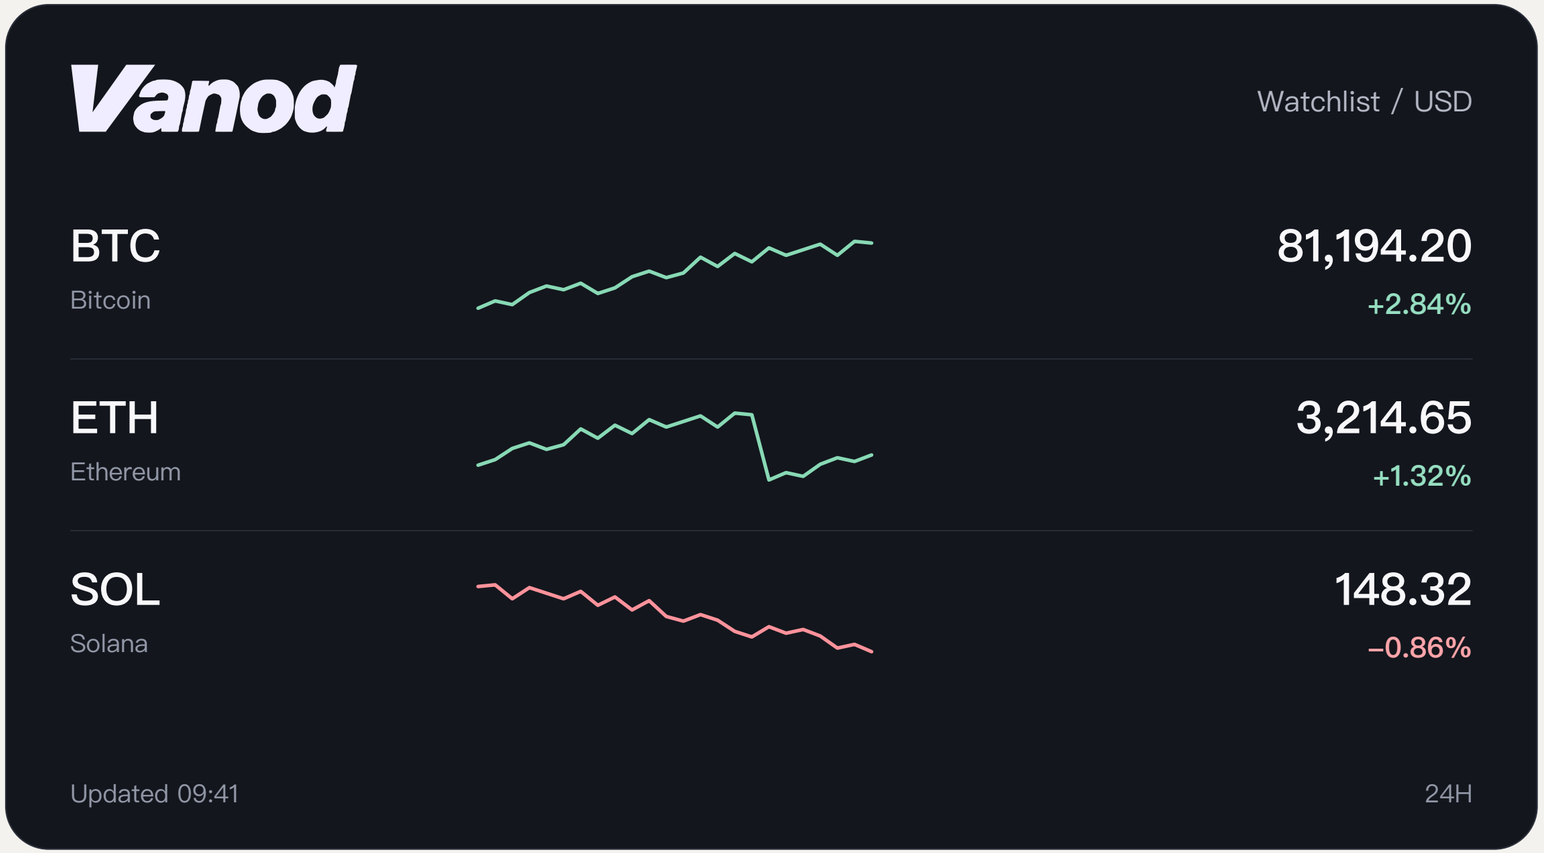

Daily price range

Interface and widget concepts / Illustrative market data

The watchlist

Keep names, trends and prices in stable columns

Stable alignment

Left–align names and right–align prices

Three rows

Keep type readable. Open the app for more

Personal selection

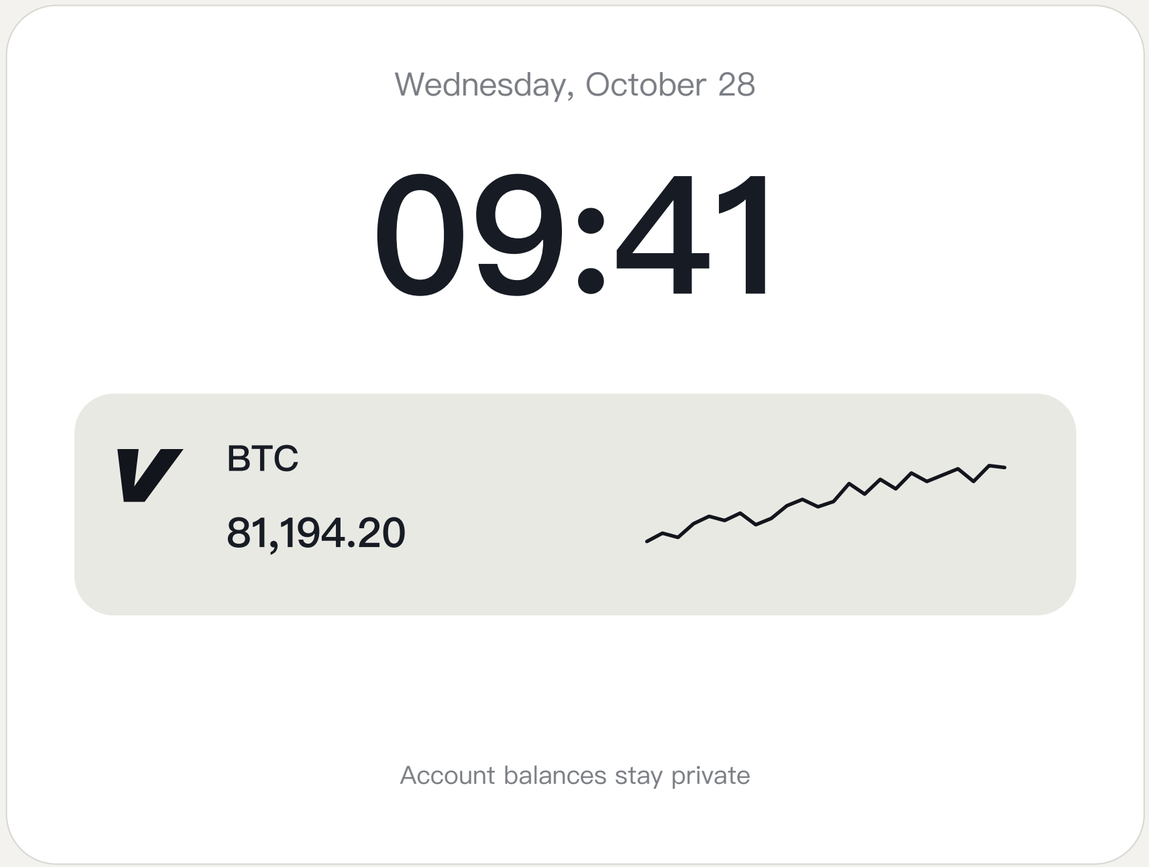

Show the selected assets and quote currency

Interface and widget concepts / Illustrative market data

On the lock screen

A monochrome expression that follows the system appearance

Interface and widget concepts / Illustrative market data

Vanod

In StandBy

Price and direction remain readable at a distance

The system determines presentation size and refresh timing.

Interface and widget concepts / Illustrative market data

Configuration and privacy

Keep choices simple and personal assets private

Edit widget

Done

Portfolio

●●●●●●

Hidden

Show only what is needed

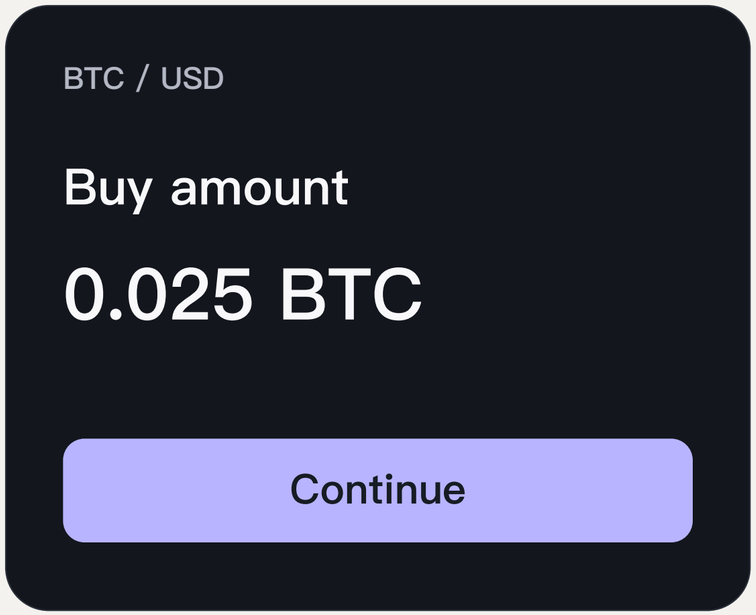

Hide balances on the lock screen. Report device connection and signing status separately.

Interface and widget concepts / Illustrative market data

Vanod

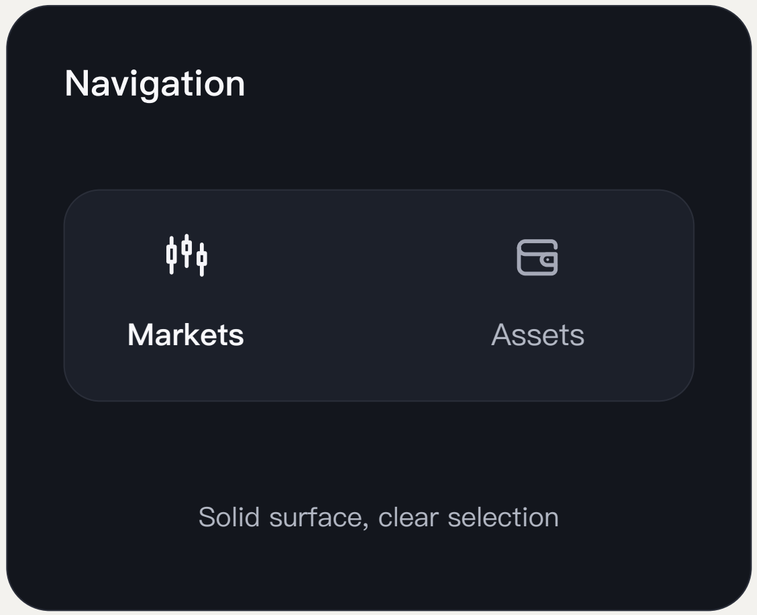

Accessible by design

Keep information complete when type grows or effects are reduced

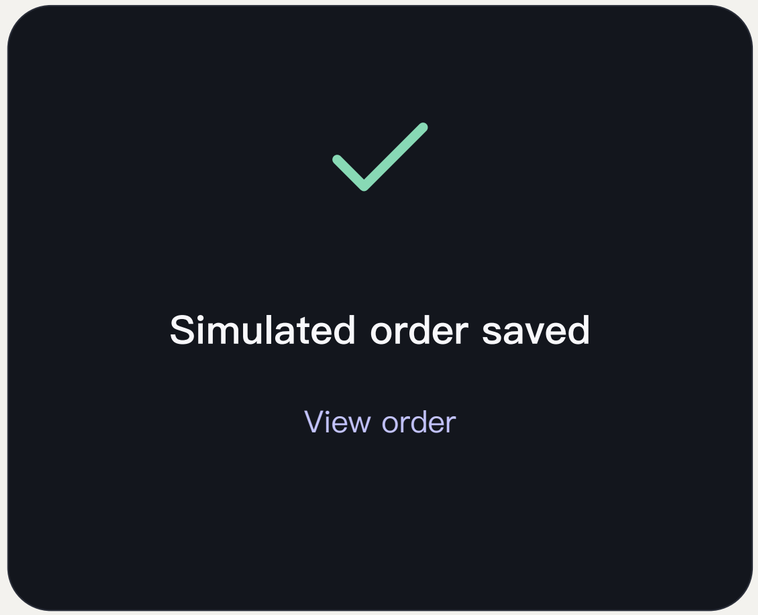

Larger type

Keep amounts, units and action labels intact

Reduced transparency

Use solid surfaces and edges to preserve hierarchy

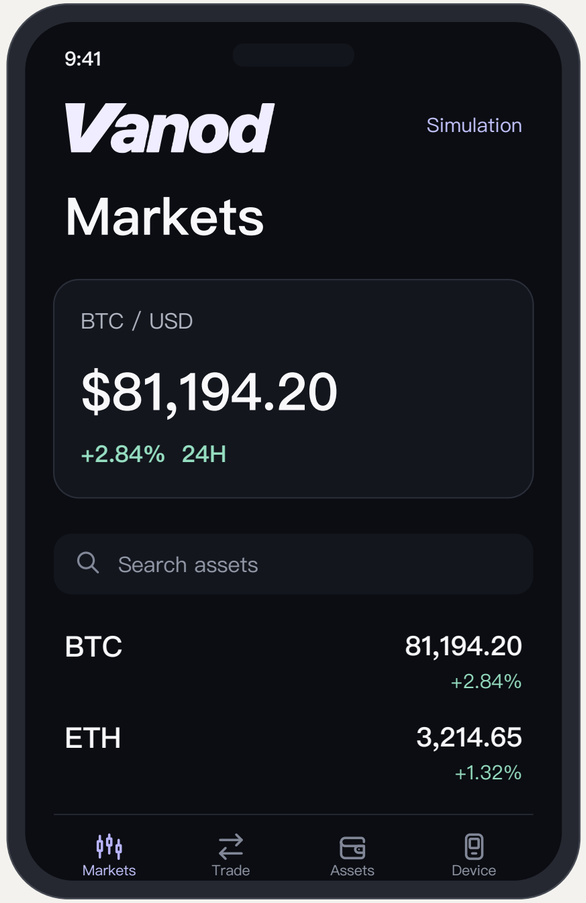

Reduced motion

Present the result without relying on a rebound

Interface and widget concepts / Illustrative market data

The mobile interface

A clear reading order from brand to price to action

Brand signature

Use the complete signature at the top without a second V

Market first

Lead with price and change, with the quote currency visible

Stable navigation

Pair icons with labels and keep the selected destination distinct

Interface and widget concepts / Illustrative market data

The desktop interface

Give market information and order entry stable places

Interface and widget concepts / Illustrative market data

Extension and recoil

Continuous changes of one shape give each state a clear rhythm

01 02 03 04 05 06

Original mark	Split and release	Arc loading	Confirmation	Recoil	Original mark
0 ms	0 – 620 ms	1420 ms	480 + 140 ms	460 ms	Complete

Two flat–ended arcs stretch along a circular track. Confirmation extends from the current shape, then recoils to the original V.

Success follows a confirmed result
Use static feedback with reduced motion

Vanod

Slate hardware

A thin rectangular form, independent confirmation and restrained material contrast

Concept mockup / Not a manufactured or security-certified product

Magnetic format

A slim profile for use against the phone.

Independent confirmation

A screen and physical keys reserve room for essential details.

Material language

Graphite metal and lilac details echo the interface.

Packaging and carry

Consistent mark placement; hierarchy through material and proportion

Packaging system

Carry sleeve

Concept mockups / Use the approved vector artwork for final print and embossing

Vanod

From screen to space

The same identity extends through signage, typography and material

Brand environment concept / Not a completed retail location

Vanod

One coherent presence

Keep the complete wordmark and generous clear space. Lighting reveals the material without changing the mark.

Production and handoff

One artwork system, two languages and a clear source of truth

01

Vector masters

Use the approved wordmark, V and icon files.

02

Type and colour

Use PingFang SC for text and sRGB colours for screens.

03

Interfaces and mockups

Interfaces are design specimens; hardware and spaces are concepts.
